AND TECHNICAL SUPPORT

Know-How

We accompany the local actors in the implementation or in the development of management solutions adapted to their territories, by taking into account their specificities.

Expertise

CBE leans punctually on structures and external speakers who enrich the studies in their specific fields of expertise.

Setting-up and intervention

Located in the Northern Province of New Caledonia, CBE takes action on the whole New Caledonian territory as well as in the Southern Pacific area.

FOCAL AREAS

WASTE MANAGEMENT PLAN

Based on waste production of a territory or a company & existing modes of waste management, we define the best options for short and medium-term optimization.

Improvement of waste management takes into account technical & economic realities and local possibilities of management and valuation.

MOUNTING WASTE MANAGEMENT CHAINS

According to the regulations (or industries's needs), we design and implement new processes of pre-collection, collection, treatment or valuation.

All of the above within a concern of statutory conformity, environmental protection and economic realism.

PROJECT MANAGEMENT & REHABILITATION OF POLLUTED SITES

- Analysis of rehabilitation needs & environmental impacts.
- Implementation & follow-up works.

We accompany the client in the rehabilitation of polluted sites such as former landfills and quarries.

CONTRACTOR SUPPORT

We provide clients with guidance and support in the implementation of global or specifically targetted environmental policies in order to reach the relevant goals, while growing the client's competencies.

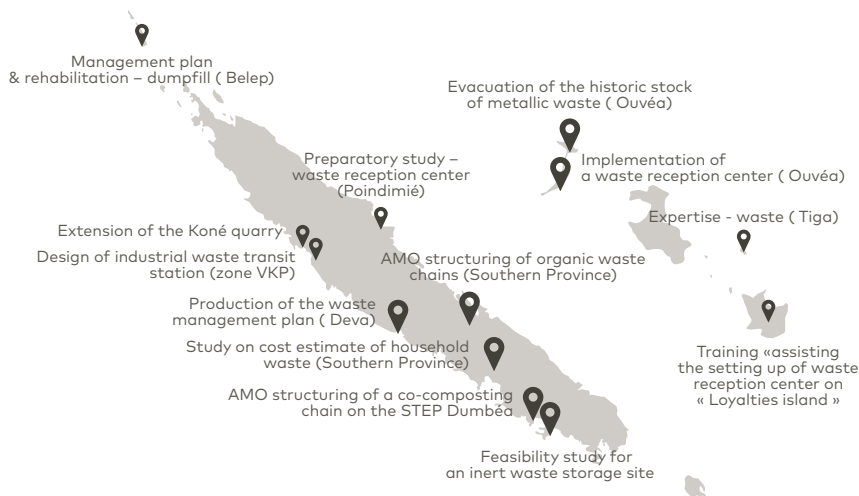

PROJECT MANAGEMENT OF WASTE STORAGE & WASTE RECEPTION CENTERS

- Waste reception centers.
- Platforms of voluntary contribution
- Platforms of transfer corresponding to territories and people's needs.

Analysis and definition of needs.
Installation start-up.

STRATEGIC CONSULTING & TECHNICAL SUPPORT

Accompany the clients (both public and private) in the implementations of economic development strategies, or activities linked to waste management.
